Text: There is no textbook for the course. I will cover topics from various sources, and will give references along the way. Try to take good notes during class.

Course website: Up to date course information and announcements can be found at www.math.ou.edu/~forester/4513S13. The Desire2Learn system will be used only to post final grades.

Quizzes: There will be frequent quizzes (roughly one per week) that will be unannounced. If you attend class regularly and pay attention, these should be easy.

Homework: I will assign some homework problems, but not on a regular basis. I may ask students to present these in class at the board.

Exams: There will be a take-home midterm exam due March 15 (the Friday before Spring Break) and a final exam on May 6, 1:30–3:30 pm.

Exit survey: If you are graduating this year, you are strongly encouraged to participate in the department’s exit survey. The department will contact you about this. We find it extremely helpful to get some feedback from you at the end of your experience as a math major.

Academic misconduct: Visit http://integrity.ou.edu for the rules governing cases of academic misconduct.

Students with disabilities: The University of Oklahoma is committed to providing reasonable accommodation for all students with disabilities. If you require special accommodation in this course you are requested to speak with me as early in the semester as possible. Students with disabilities must be registered with the Office of Disability Services prior to receiving accommodations in this course. For further information please see http://drc.ou.edu.

Withdrawal Policy: Through March 29, you may drop the course and receive a “W” grade. Dropping the course on or after March 30 requires a petition to the Dean.

Grade of Incomplete: The grade “I” is a special-purpose grade given when a specific task needs to be completed to finish the coursework. This is typically a term paper or other special assignment, so rarely makes sense in a mathematics course. An “I” cannot be given to avoid a low grade.
