

**MATH 4433 COURSE INFORMATION  
SUMMER 2012**

**Instructor:** John Albert

*Office:* PHSC 1004

*Phone:* 325-3782

*Office Hours:* Mondays, Tuesdays, and Thursdays from 1:30 to 2:30 (or by appointment)

**Prerequisite:** Math 2513 (Discrete Mathematics), or permission of instructor.

**Materials:** The text for this course is *Introduction to Real Analysis (Fourth Edition)* by Robert G. Bartle and Donald R. Sherbert. We will cover most of chapters 2 through 6, and as much of chapter 7 as time allows. Chapter 1 contains preliminary material which we will refer to when necessary as we go along.

Information about the course, such as homework assignments and quiz and test dates, will be posted on the course web page at [learn.ou.edu](http://learn.ou.edu). (This is a mirror of the page on my own website, which is at [www.math.ou.edu/~jalbert/courses/4433su12.html](http://www.math.ou.edu/~jalbert/courses/4433su12.html).)

**Grading:** The course grade will depend on your scores on the daily homework assignments, on several quizzes, and on three one-hour exams (given Friday, June 1; Friday, June 22; and Friday, July 6). Your overall score for the course will be determined by the formula

$$(\text{score}) = (\text{homework percent}) \times (0.45) + (\text{quiz percent}) \times (0.10) + (\text{sum of scores on exams}) \times (0.45).$$

This means that the homework accounts for 45% of the final score, the quizzes count for 10% of the final score, and each of the three exams accounts for 15% of the final score.

Make-up exams will be given only when there is a compelling reason, such as illness, for being absent from the exam. If you are unable to attend an exam, please call me BEFORE the exam begins. If I am not in my office, leave a message for me at the Mathematics Department. The departmental phone number is 325-6711.

**Disabilities:** Students with disabilities who require accommodations in this course should speak with me as early in the semester as possible.
